

NICE 2023

April 11-14, 2023 | 8AM-5PM | University of Texas at San Antonio

The 2023 **Neuro-Inspired Computing Elements (NICE) Conference** is the 10th annual meeting of researchers in the neural computing field. NICE 2023 will focus on the interplay between neural theory, neural algorithms, neuromorphic architectures and hardware, and applications for neural computing technology.

NICE aims to involve diverse participation from all over the world and bring together research communities with universities, government, and industry.

KEYNOTE SPEAKERS

Gert Cauwenberghs, Ph.D.
Professor of Bioengineering, and
Co-Director, Institute for Neural
Computation, The University of
California San Diego

Risto Miikkulainen, Ph.D.
Professor of Computer Science,
and AVP of Evolutionary
Intelligence at Cognizant AI Labs -
The University of Texas at Austin

Michael Milfred, Ph.D.
Professor of Electrical
Engineering Deputy Director
Queensland University of
Technology Center for Robotics
